Product introduction

Thank you for choosing this large capacity power bank. I believe that it will bring you great convenience. Please read the following instructions carefully before using, so that it can bring you a good operate experience and you can enjoy the right of after-sales service to a large extent.

The excellent polymer is adopted to make the normal circulation service life reaches or even more than 1000 times. Power bank built-in protection circuit against over-current, over-heat and over-voltage, which ensures security. New type of acrylic makes it more fashionable, light and less subject to damages.

Description

1 ▶▶

Usage method

Please make sure the charge voltage of your electric device is between DC4.8V to 5.5V before your next step, then choose the suitable connector for your device.

- Take out your power bank and the USB cable. Link the electric device and power bank correctly. Double-click the output switch, then the backlight of LCD screen will display "output". At that time you can see the charging status of your device. It means the power bank works properly.
- When your electric device is full charged or incorrectly connected. The self-test function would be aroused and the output will shut off automatically after 20 seconds.

2 ▶▶

- Open the LED light: Press the power switch for about 2 seconds, LCD screen will display "☞" which means LED light is up. Repet operation, LED light would be turned off.
- Time adjustment: Press the "time set option/confirm" for about 2 seconds and then press time set + or time set --to adjust the "hour" and repet the last step to adjust the "minutes" . Then press time set button again to save and exit.

Power indicator

80% - 100%

60% - 80%

30% - 60%

1% - 30%

- Power light shows the percentage of the left power.

- Charge your power bank: You can use USB and Micro USB connector to charge the power bank from USB adaptor or PC's USB port or Car charger. When all power indicators light, It means your power bank is fully charged. It will stop charging automatically.

Note:

The charger on this picture do not included in this package.

3

Specifications

Battery Cell type	3.7V 4000mAh 14.8Wh
Rated input	2V 2000mA (max)
Input port	5V 1000mA
Charging time	5-6 hours
Product Dimension	110*60*14mm
Package size	176*95*30mm
External material	engineering plastics, acrylic
Operating temperature	-10°C ~ 50°C
Net weight	115g
Gross weight	250.8g
Perform standard	GB493.1-2001

Maintenance

1. Please charge it every 3 months when not using.
2. Please keep it away from water, moisture and corrosive chemicals.
3. Don not clean it using chemicals or detergent. Just wipe it gently using a soft cloth with soapy water.
